Friday July 3rd

Sun (1 trip)

Mr Brookham & G.W. Lee came here this afternoon & 4 of us started in the cone tonight. We went to the Marble Quarry to explore. Mr Brookham let his boy down in Council Chamber by means of a rope. We discovered a large room to the north-west of the Chamber of Council that we called the College. From the College we found a passage leading to Monte Cristo's Palace. We also found a passage leading from the Chamber of Council to Mount Builders rest by way of the Tennis Court.

Saturday July 4th

Sun 1. trip

Sun 1. trip

We got out from our exploring trip at 5:30 this morning, making an 11 hours trip the longest that I have taken this year. Mr Brookham & son, Mr Lee & I took a trip through Crystal Palace this forenoon. The same four started in the cone this evening with the intention of going to Beacon Height but did not get quite there. When we got to the top of the climb near the Photograph gallery Mr Brookham & I went on an exploring expedition which led to the discovery of "Silent Lake" by Mr. E. Brookham & the Lake-Side Sceneries by me.
